To Whom it May Concern,

I am writing this letter on behalf of Christopher Marker as a strong recommendation of his art skills, personality, and aptitude for growth. Chris was a student of mine at DigiPen and repeatedly demonstrated his skill in creating 3D art, meeting tight deadlines, and pushing himself to expand his skill set.

I arrived at teaching after 14 years working in the games and aerospace industries. I have a strong grasp of what it takes to perform under tight deadlines with near impossible requirements. I try to recreate this environment in my classrooms with skills tests and assignments. Chris was able to ingest what was being asked of him and still excel. Because of that, I have confidence that he would thrive in a fast-paced, high demand work setting.

Please consider Chris for employment. I can say with certainty you will not be disappointed.

Very best,

**-Kevin Burgess
